EXPERIENCE

Client Support Specialist (Team 2) | Q4 Inc.
MAR 2022 – CURRENT

- Working with the Q4 Studio CMS to help our publically traded clients keep their websites up to date and compliant with regulatory standards.
- Conducting styling and functionality changes that support the completion of high impact content updates.
- Adding and updating the widgets on the clients' websites utilizing Mustache.js
- Completing billable change requests for the high alert clients that include large content updates, custom functionality, building responsive web pages using HTML, CSS, and JS.
- Working on several large-scale debugging projects, such as "no-daddy" and "site launch issues".

Support Analyst | Q4 Inc.
OCT 2020 – MAR 2022

- Facilitated content updates, such as adding or replacing webcast information, presentations, press releases, financial reports, HTML content, etc.
- Performed minor styling updates using CSS.
- Ensured timely delivery of client updates.
- Communicated with the clients frequently and in professional manner to keep them informed on the status of their requests.

FEATURED PROJECTS

Numberlicious (View Live) | HTML5, CSS3, React, REST API

- An app that gives the user an interesting fact about a number in one of the given categories.

Pirate Card Draw (View Live) | HTML5, CSS3, SASS, jQuery, REST API

- Cartoon pirate themed card draw game where the user plays against the computer. Higher card wins!
